PROJECT EXPERIENCE

NWUMessenger

Vanderbijlpark, Gauteng

Project Manager

- Led a 7-member cross-functional team leveraging Agile and FAST framework to deliver a feature-rich mobile chat app with an integrated system for North-West University within 12 months. Demonstrated expertise in leadership, communication, teamwork, problem-solving, and time management to drive a complex project from ideation to successful deployment in a fast-paced environment.
- Utilized Draw.io to create efficient UML diagrams and ERDs, facilitating clear communication and project planning.
- Took the initiative to learn Dart and the Flutter framework, enabling seamless mobile app development for both Android and iOS platforms.
- Employed Git and GitHub for version control and collaboration throughout the project lifecycle. Maintained comprehensive project documentation, including sprint backlogs, and project reports, ensuring transparency and adherence to Agile principles.
- Effectively addressed and resolved on-the-fly challenges while adhering to project scope and timeline constraints.

SKILLS

Technical: Python, Java, C++, Git, Dart/Flutter (Mobile Development)
